PROFESSIONAL SUMMARY

Passionate Software Engineering graduate (CGPA: 3.85/4.00) with production-grade experience in AI/ML system design, deep learning pipelines, and real-world automation. Built Aegis AI — a 6-microservice AI cybersecurity platform featuring a 6-model deepfake detection ensemble trained on 140,000+ samples in PyTorch (AUC: 0.97) — demonstrating end-to-end ML engineering from data preprocessing and model training through ensemble fusion and async API deployment. Currently contributing to a live AI automation project at LESCO, developing a Python-based electricity theft detection system to replace manual workflows. Proficient in PyTorch, FastAPI, Python, REST APIs, Docker, PostgreSQL, and LLM integration (Ollama/LLaMA 3.2), with a strong drive to solve real technical challenges in collaborative, fast-paced AI environments.

TECHNICAL SKILLS

Languages	Python, JavaScript, PHP, Java, C++, SQL
Frontend	React 18, TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS, jQuery
Backend & APIs	FastAPI, REST APIs, WebSocket, JWT Authentication
Databases	PostgreSQL, MySQL, Redis (caching & session management)
AI / ML	PyTorch, scikit-learn (Random Forest, ML pipelines), Ollama (LLaMA 3.2)
DevOps & Tools	Docker, Docker Compose, Git, GitHub, VS Code
Software Engineering	Microservices Architecture, SDLC, UML Diagrams, Agile, Technical Documentation
Security	SHA-256 Hashing, HMAC Validation, HIBP k-Anonymization, GDPR-compliant Design
Data & Analytics	Microsoft Excel (Advanced), Google Sheets, Power BI (Data Visualization), Google Drive, Data Cleaning, Dataset Organization, Duplicate Checks, Research & Verification

EDUCATION

BS Software Engineering — Lahore Garrison University	2022 – 2026
CGPA: 3.85 / 4.00 • High Achiever Certificate (awarded 5 times)	
Intermediate (Pre-Engineering) — Aspire Group of Colleges, Lahore	2020 – 2022 81.27%
Matriculation — Fazaia Intermediate College, Lahore	2018 – 2020 92.54%

EXPERIENCE

IT Intern — Lahore Electric Supply Company (LESCO) Jul 2026 – Sep 2026

Pakistan's largest electricity distributor serving 6.9 million consumers | stipend | Merit-selected

- Independently developing a Python-based automation system to detect electricity theft by analyzing consumption patterns and anomalies in LESCO's billing data — replacing a previously manual, time-intensive review process.
- Working with large datasets in Excel and Python (pandas) to clean, organize, and validate electricity consumption records; maintaining tracking sheets and progress logs shared with supervisors via Google Drive.
- Gaining hands-on exposure to enterprise IT operations within a large-scale public sector utility, including data governance, reporting workflows, and departmental coordination.

PROJECTS

Aegis AI — Unified Cybersecurity Platform (Final Year Project) | FastAPI • React 18 • TypeScript • PyTorch • Docker • PostgreSQL • Redis

- Architected a production-grade cybersecurity platform with 6 independent microservices accessible via both a WhatsApp chatbot and a React web portal — eliminating the need for any app installation.

- Developed a 6-model ensemble Deepfake Detector (EfficientNet-B4, ViT-B/16, FrequencyCNN, Spatial CNN, Temporal Transformer, SRM-CNN) achieving AUC up to 0.97 on 140,000+ training samples; implemented a custom confidence-enhancement algorithm to sharpen borderline predictions.
- Implemented privacy-by-design principles end-to-end: SHA-256 credential hashing, HIBP k-anonymization for password breach checks, JWT dual-token auth with bcrypt, and zero raw-credential storage.
- Exposed all 6 microservices via documented REST APIs, with asynchronous FastAPI endpoints using for concurrent external calls — both the WhatsApp and web interfaces consume the same API layer.

GPA Genie — Academic Calculator Web App | PHP • MySQL • HTML5 • CSS3 • Bootstrap • jQuery

- Designed and deployed a full-stack web application enabling university students to calculate SGPA, CGPA, and grade conversions with a mobile-responsive interface.
- Engineered server-side logic in PHP with MySQL for data persistence; implemented complex query optimisation and input validation for reliable performance.

CERTIFICATIONS & AWARDS

- Python for Data Science — Udemy
- English for Professional World — Udemy
- High Achiever Certificate (5x) — Lahore Garrison University
